

Connecting People to Surrey's Parks

Contributed by Mandy Hadfield, Park Operations Coordinator – Park Partnerships, City of Surrey

Bear Creek Park is often referred to as Surrey's 'Crown Jewel' of parks. The offerings at this park range from a playground to walking trails to an outdoor pool. It also hosts a beautiful show garden where many people say their nuptials. Every summer the people of Surrey descend on Bear Creek Park in droves, some come for festivals and some come to simply let their little ones run through the spray park.

With all that positive park use we still find that most park users are not aware of the impact they have on the park, positive or negative. They're definitely not aware of all the incredible amenities the park offers. Park Connect will help engage Surrey residents with this beautiful natural environment that sits in their 'back yard' through a new program called Park Connect.

Park Partnership staff created Park Connect to further connect residents to their surroundings. Summer activations and programs in will include programs for all ages. Daily litter clean ups,

yoga and art at our Senior's in the Park sessions, family play times like Park Play, nature walks, and Youth events in the skate park.

Bear Creek will be a hub of activity this summer. Our hope is to bring new users to the park, to introduce them to the joys of the natural environment while also engaging those people who are already avid park users and get them further connected to their community and the great outdoors.
